

PVC Pallet

-Tigerat Industrial (Shanghai) Co., Ltd

With 3-roller forming technology and most advanced production in China, we have developed the new-generation tough composite material-PVC pallet. It has the following features: high density, high strength, impact resistance, corrosiveness resistance. After repeated testing, PVC pallet has become the reliable pallets for clients. It has successfully solved the problem of water absorption and short life of bamboo pallet.

PVC PALLET

Specifications:

1. Thickness: 8-50mm
2. Width: Custom-made
3. Length: Custom-made
4. Density: 1800kg/m³
5. Service Life : More than 6 Years
