The DEBEX company has been on the market for more than 35 years. It was founded in 1980 in Switzerland where it still has its headquarters to this day. From a small company it has grown into modern mass-production factories, which sell their products all over Europe and to USA.

The company's main activity is producing picture frames. The production is concentrated in its daughter company Ramex a.s. in Slovakia. Another daughter company, Debex Ukraine was founded in Ukraine. It deals in MDF boards as well as picture frame components. Both subsidiaries deliver to customers in Europe directly.

At the present time the DEBEX Group employs around 150 people in its modern companies consisting of production, sales, logistics and associated departments. DEBEX only sells to wholesalers, importers, big stores, and other picture frame manufacturers. Nowadays DEBEX exports to more than 50 different countries.
